

At 12mm to 15mm deep, Addaprint DP provides an authentic paved or cobbled look surface. Addaprint DP is a resin-based surface which can be cold applied onto existing asphalt, concrete or timber.

New Deeper Addaprint Launched

Continuous product development by Addagrip has led to the launch of Addaprint Deep Print (DP).

At 12mm to 15mm deep, Addaprint DP provides an authentic paved or cobbled look surface. Addaprint DP is a resin-based surface which can be cold applied onto existing asphalt, concrete or timber.

One of the first projects to use the new Addaprint DP material is Snow Motors Group's flagship Lexus & Toyota dealership in Hampshire where some 250 square metres of footpaths have been installed by Specialist Industrial Coatings Ltd. In this context, the attractive aesthetics of Addaprint DP ideally matches the prestige ambience of this 'top end' dealership.

The decorative surface for Addaprint DP of paving blocks or cobbles is achieved with a pattern tool to very simply 'add a print'. The surface is available in a range of natural aggregate colours.

Further information on Addaprint DP is available from Addagrip on 01825 761 333, email sales@addagrip.co.uk or by visiting the company's website at www.addagrip.co.uk
